DETAILED ACTION

Claim Objections

1. Claim 2 is objected to because of the following informalities: the phrase "natural frequencies" first recited in line 4 of claim 2 should be changed to --natural vibration frequencies-- to be consistent with the language in claim 1. This change should be made throughout the claim listing. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 23 and 24 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The originally filed specification fails to provide support for the limitation of measuring braking pulsing frequencies. Paragraph [0029] of the published application suggests that the frequencies are *inferred* and not actually measured. Clarification is required. Claim 24 is rejected due to its dependency from claim 23.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-4, 15, and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 6122584 to Lin et al.

Lin et al. disclose in col. 20 lines 54-60 a method of controlling the ABS comprising: accumulating responses of the ABS to a series of sudden braking events (based on measured speed), correlating the ABS responses to one or more natural vibration frequencies of the vehicle, and selecting an ABS response to a brake request based on the correlated ABS responses, in order to avoid exciting the power train at the one or more natural vibration frequencies.

Allowable Subject Matter

6. Claims 8-14 are allowed.

7. Claims 5-7, 16, and 18-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. Claims 23 and 24 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 1st paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Response to Arguments

9. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
